

Crack Segmentation Dataset

Test Split — Ground Truth Reference (Binary + Instance Segmentation)

This report documents the ground-truth labels for every image in the **test** split of the crack-segmentation-ryckv-ysc3h dataset (Roboflow), covering two of the dataset's ground-truth label types: **Binary Classification** (Crack / No Crack) and **Instance Segmentation** (COCO polygon annotations). Direction classification is intentionally omitted from this version.

A note on "89": the test split contains **89 original crack-containing images** (each with COCO instance-segmentation polygons) plus **89 crack-free negative crops** generated from those same source photos, for a total of **178 test images** — a deliberate 89-vs-89 parity split so that crack-vs-no-crack detection can be scored with a real confusion matrix (TP/FP/FN/TN) instead of a near-degenerate class balance. This report includes all 178 images, grouped so each original crack image (shown as its ground-truth instance mask: black background, each crack instance filled in a solid color) is immediately followed by its paired no-crack crop(s), shown as solid black since they contain no instances.

Metric	Count
Total test images	178
• Crack images (Binary = Crack)	89
• No-crack images (Binary = No Crack)	89
Total segmentation instances (crack images)	209

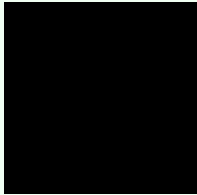

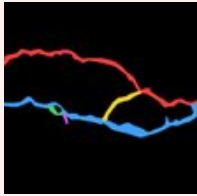

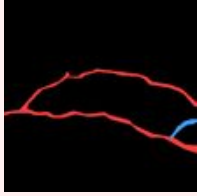

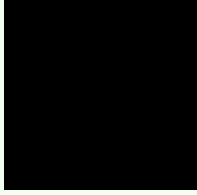

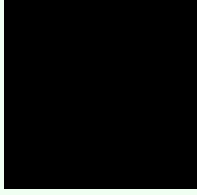

Image (ground-truth mask: instances on black)	File Name	Binary Classification (Crack / No Crack)	Instance Segmentation
	CFD_008.jpg.rf.3kdUreYEiR6ktFhAvWJ0.jpg	Crack	1 instance (COCO polygon)
	CFD_008.jpg.rf.3kdUreYEiR6ktFhAvWJ0_-negcrop.jpg	No Crack	— (no annotation)
	CFD_012.jpg.rf.9sScQhZRF6RbBbyjWga5.jpg	Crack	5 instances (COCO polygon)
	CFD_012.jpg.rf.9sScQhZRF6RbBbyjWga5_-negcrop.jpg	No Crack	— (no annotation)
